National Establishment Time-Series (NETS) Database

To develop a database that better described the *dynamics* of the U.S. economy, Walls & Associates teamed up with Dun and Bradstreet (D&B) to convert their archival establishment data into a *time-series database* of establishment information, the *National Establishment Time-Series* (*NETS*) *Database*. This was accomplished by taking *eighteen annual snapshots* of the full Duns Marketing Information (DMI) file that followed over 34 million establishments between 1990 and 2007. These snapshots actually used the DMI file to determine which establishments were active in January of each year in question. Other archival files (e.g., the Credit Rating file) were utilized to provide annual raw establishment data that allowed us to create time-series information in the following categories:

- Business name, address and contact information (including officer, title, phone number, FIPS codes and longitude and latitude).
- Headquarters linkages (including the D-U-N-S Number of the topmost domestic firm in a "Family Tree" of companies, as well as the parent company and headquarters, the location of the establishment within the corporate hierarchy, and whether the ownership has changed 1990-present).
- Number of related² establishments in the same state.
- Years when business was active ("1989" is earliest year in Database and, currently, "2007" is the latest year) and year business started.
- Industry classification (primary SIC and up to five secondary SICs; whether the primary 3-digit SIC changed 1990-present).
- Type of establishment (Single location, headquarters, or branch; public or private; and legal status: proprietorship, partnership, corporation or non-profit).
- Employment at location and job growth relative to peers (3-digit SIC).
- Estimated annual sales³ at the establishment and its sales growth relative to peers.
- D&B credit ratings and PayDex Scores⁴ (January, minimum and maximum for previous year).
- Special indicators: foreign-owned,⁵ import/export,⁶ government contracts,⁷ minority-owned, women-owned, and gender of officer.

¹ Includes legal business name and, if different, trade name (usually more commonly known name).

² Related establishments include those who have the same Ultimate D-U-N-S Number (topmost domestic firm in a "Family Tree" of companies). We also track the number of

³ Sales are reported at the firm level; so a standalone establishment would generally report its sales. For other establishments, firm-level or, when unavailable, industry sales per employee are used to estimate the establishment sales. In many cases, there are no sales at the establishment because it is an intermediate production or distribution facility. However the estimated sales are reported to indicate the level of economic activity at that facility.

⁴ A 100 point indexing system that represents trade experiences reported to D&B, compares payment to terms of sale, and scores the overall manner of payment. The index is dollar-weighted by high credit. A PayDex Score of 80 indicates that, on average, the business pays its bills in a "Prompt" manner.

⁵ This code indicates whether a controlling interest of the outstanding stock in this business is held by a party or parties outside of the United States.

⁶ Indicator that shows whether the business imports, exports, does both, or neither.

⁷ Indicates whether or not this business has government contracts or grants.

• Relocation information (origin and destination of *significant moves*, employment and sales in move year, and whether the establishment moved more than once 1990-2006).

A full list of the *NETS Database* fields is included in the Appendix. Each Summer the *NETS Database* is <u>updated</u> with another year of establishment information. No establishments are ever deleted from the *Database*; but their "LastYear" is indicated, so one can explore the dynamics of "births" and "deaths" of establishments. Walls & Associates maintains the *NETS Database* and continues to update and improve estimates before the next annual update. Walls & Associates uses the *NETS Database* in the conduct of its own consulting business and licenses the *Database* to other researchers and analysts.

Copyright Protection: As close to March 30th as practical each year, Dun and Bradstreet assembles a snapshot of their archival establishment data for January of that year. The first such delivery was in July-December 2000. The Dun and Bradstreet data is proprietary to D&B and comprises: (1) works of original authorship, including compiled information containing the D&B's selection, arrangement and coordination and expression of such information or pre-existing material it has created, gathered or assembled; (2) confidential and trade secret information; and (3) information that has been created, developed and maintained by D&B at its expense such that misappropriation or unauthorized use by others for commercial gain would harm D&B. The *NETS Database* is created from the D&B data by Walls & Associates from (1) works of original authorship, including computer programming; code; text; and other protectable expression; (2) confidential and trade secret information; and (3) information and works of authorship that have been created, developed and maintained by Walls & Associates at its expense such that misappropriation or unauthorized use by others for commercial gain would harm Walls & Associates. No user of the *NETS Database* shall commit, or knowingly assist any third party to commit any act or omission that would impair Walls & Associates or Dun and Bradstreet's rights in the original data or the *NETS Database*.

⁸ A *significant move* is one in which <u>both</u> the establishment's 5-digit ZIP Code and their physical address change between years. In addition, if the establishment "returns" to the same address in future snapshots, then the address change is assumed <u>not</u> to be a significant move (either because the changes were clerical or because the move was "temporary").

⁹ While there is no legal requirement for establishments to report to Dun and Bradstreet, there is a financial incentive for those activities that wish to get lines-of-credit with suppliers or financial institutions. In addition, Dun and Bradstreet—even without the help of the establishment themselves—has independent sources of information that allow it to develop relatively complete business lists. Nonetheless, one has to examine the *NETS Database* with the understanding that, while consistently reported, some establishments may avoid detection.

¹² Note: The Year-of-Move Database always has one less year than the National Establishment Database because we only know about relocation when we can *compare* one year to the next to determine if the establishment's address has changed. Since we are looking at January data, we presume that the move occurred in the previous year.
